Professional Summary

- Full Stack Developer and ML Engineer with 1 year of experience in AI application development and production-ready software
- Track record in building 10+ projects including a RAG-based AI Study Notes Generator and deploying scalable applications on Vercel using advanced web crawling and API integration
- Skilled in Python, RAG Architecture, and React, known for delivering AI-driven automation solutions

Skills

Technical Knowledge: Python, R, C, Java, (HTML, CSS, JS), Git, React Framework, SQL, PHP, API

Tools: GitHub, Linux, RAG Architecture, Wordpress, Android SDK, Expo Router, MongoDB, Vercel, Supabase, Microsoft Office

Soft Skills: Leadership, Problem Solving, Detail Oriented

Experience

AI ML Intern – Networker's Home | Feb-Mar 26

- Completed an intensive 1-month AI & Machine Learning internship, developing 6+ production-ready projects including a RAG-based AI Study Notes Generator with intelligent Q&A and a WhatsApp Clone, earning recognition as AI Champ among top performers.
- Built multi-functional applications including a CLI File Management Robot with API integration, Python-based file organiser, and a Role-Based Access Control Dashboard, deploying projects on Vercel and leveraging Firecrawl for advanced web crawling.

Visual Intern | Assistant Squad Leader – Gao Tek | Nov-Jan 26

- Developed visually engaging designs and creative concepts using Canva, translating complex ideas into compelling visual storytelling solutions aligned with brand guidelines.
- Coordinated a team of 62 visual interns as Assistant Squad Leader, optimizing workflow efficiency by assisting in task allocation and reviewing design outputs for brand consistency.

Projects

🔗 Cortex | Next.js, TypeScript, PostgreSQL

- Built an AI-powered study OS with focus timers, YouTube summarization, and RAG-based workspace for interacting with documents, URLs, and media
- Implemented multi-format knowledge ingestion and AI-driven quiz/flashcard generation with contextual reasoning

🔗 StealthTab | JavaScript, Web Crypto API, WebAuthn

- Developed a security-focused browser extension to cloak sensitive tabs using encrypted storage and decoy redirection
- Integrated biometric authentication (WebAuthn) and AES-256 encryption with volatile session management for enhanced privacy

🔗 Robot CLI - Based System Intelligence | Python

- AI-powered Windows CLI agent using natural language to manage files, monitor system health (CPU/RAM), and automate tasks with Python and with OpenRouter API integration.

🔗 NHAPP - Whatsapp Frontend Clone | React.js, Expo Router, Convex

- Designed and developed a real-time messaging mobile app using React Native (Expo Router) and Convex with email-OTP authentication, multimedia chat, voice notes, status updates with viewer tracking, message reactions, and group messaging features.

Education

New Horizon College - BCA CGPA: 8.82	2026
Narayana PU/CBSE College Per% : 81.83	2023
SEA International School [ICSE] Per%: 82.5	2021

Certifications

Java Essentials - Cisco Networking Academy	2026
Data Science and Fundamentals – Cisco Networking Academy	2025
Software Testing – Alpha Tech Academy	2025
Angular JS – Alpha Tech Academy	2024
Machine Learning – Great Learning	2024
